RUSH — TIME DATED

TODAY & TOMORROW

(Newsbriefs continued)

Women who have been widowed within the past year are invited to participate in a research project at Langley Porter Psychiatric Institute's Center for the Study of Neuroses. The project director is psychiatrist Mardi Horowitz, who is known for his work in helping people accept and adapt to stressful events. The goal is to provide better mental health services to bereaved persons.

Women who want help to work through their loss will receive short-term psychotherapy at a nominal charge. A participant must not have received other psychotherapy since the death of her husband. Women interested in participating should call x7-510.

Construction is scheduled to begin in February on the 4th and 5th floors between the Medical Sciences and the Clinical Sciences buildings. Construction activities will include jackhammering and saw cutting of the concrete stairs, changing corridor doors and ceiling, and relocation of smoke detectors and door alarm switches. There will be barriers blocking both sides on both floors for the two weeks it takes to complete the project. For further information contact Joe Bluford, x1360.

The Shopper's Shuttle is no longer operating from the campus to the 9th and Irving shopping area. The service began in September, 1979 for a three-month trial period subsidized by the Inner Sunset Merchants Association.

The first color films dealing with childbirth education in a cultural context to be made available nationwide have been produced by the UCSF Bilingual Media Project at SFGH. The project is funded by a grant from the California State Department of Health, Maternal and Child Health Branch.

Available on both 16 millimeter color film or videotape cassettes, the three ten-minute programs were produced by Terry Looper, Claris Barahona-O'Carroll, and Lora Fountain.

They are designed to serve as aids to group discussion on pregnancy, birth, and postnatal care in clinics serving black, and Spanish speaking expectant parents. They can also be used as educational tools for health professionals. Featured in each film are actual hospital and clinic staff members, patients and their families.

For further information contact Video Graph, 2833-25th St., S.F. CA 94110, telephone (415) 283-6001.

Half-Cost Carpool Transit Systems (HCCTS) is a new service offered to the campus through Transportation Services. Any campus employee can benefit from this service by calling in S.F., 845-1769, and stating the UCSF membership number, 91139.

Persons have the choice of a driveaway car or sharing a ride and paying half the gas. Telephone numbers will be given of people listed as traveling to the same area. For further information contact Helen Kirkpatrick, x1511.

Volunteers are needed to help with Tay-Sachs screening, Monday, February 4, 10 a.m.-1 p.m. in Millberry Union, and 2-5 p.m. at Hastings College of Law. Physicians, people to draw blood, and clerical help are needed.

The screening , sponsored by Hillel, is free and open to the public.

Tay Sachs Disease is a recessively inherited genetic disorder which causes destruction of the nervous system, resulting in rapid deterioration of physical and mental capabilities. The disease is always fatal by the age of six years. When both parents are carriers of the same recessive gene, there is a 1:4 chance that the child will be born with Tay-Sachs. Carrier incidence in the general population is 1:2000, but among the American Jewish population the incidence is 1:27.

If you can help with the Tay-Sachs screening, contact Linda Michels, 333-4922 or the Tay-Sachs Program office in Oakland, 654-6064.

DEADLINE

Deadline for the next issue of *Today & Tomorrow* which will cover Feb. 2-15, will be **Tuesday, Jan. 22, 11 a.m.** Please send your copy to Allen Balderson, 1475-4th Ave., x2557.

How laughter can be used as a therapeutic tool is one topic that will be discussed in the "Healing Brain" Symposium, Saturday and Sunday, January 26 and 27 at the Sheraton Palace Hotel, S.F.

The symposium, sponsored by Continuing Education in the Health Sciences and the Institute for Human Knowledge, will include as speakers Norman Cousins, author of the bestseller, *Anatomy of an Illness as Perceived by a Patient*; David Sobel, a fellow of the Health Policy Program and acting chief of Preventive Medicine, Kaiser Medical Center in Santa Teresa; Jon D. Levine, acting chief, Pain Research Laboratory; Robert Ornstein, author of *The Psychology of Consciousness* and *The Mind Field*, and Karl Pribram, professor of Neuropsychology at Stanford. For further information call x2894.

MUNI's crosstown (north/south) service to UCSF is scheduled to change in April. The short term plans, part of a five-year master plan, call for the extension of the No. 43-Masonic route from Masonic to Cole to Parnassus and to 9th Avenue and beyond to the Forest Hill Station, down to Monterey Boulevard, City College, Balboa Park and ending at Mission and Geneva. In addition, MUNI intends to increase the frequency of the buses on this route.

The No. 44-O'Shaughnessy, which runs from Diamond Heights to Forest Hill Station, will be upgraded and will replace the No. 10-Monterey, North of Forest Hill Station, going across Golden Gate Park on 9th Avenue and into the Richmond District. It will not travel over Diamond Heights, but instead take O'Shaughnessy Boulevard. On the Southern end it will replace the No. 51-Silver serving the Hunters Point and Bayview Districts.

It is hoped the changes will improve MUNI access to UCSF and make it unnecessary to drive to campus, especially for individuals living in the Richmond, Presidio, Marina, Diamond Heights, Portola, Bernal Heights and Bayview/Hunters Point communities. For further information call MUNI at 558-5284.

Also, on Wednesday, January 23 from 11 a.m. to 1:30 p.m. in Medical Sciences Lobby, there will be a transportation planner from BART to answer questions and provide information on that transportation system.

NEWS BRIEFS

A statement issued by Vice Chancellor Evanoff to the campus community indicates that it will be several months before a decision is made as to the constitutionality of the proposed "lump sum" salary increase (SB 91) which had been passed earlier this year as inflation relief legislation.

If the law is upheld, there may be a change in the interpretation of who is eligible for the lump sum. A recent opinion of the Attorney General states that only individuals who were employed on the effective date of the statute, July 2, 1979 (not May 31) and are still employed are eligible.

A special cost-of-living increase amounting to 1.5% will go to all UCRS retirees whose benefits started on or before January 1, 1980. The increase will be reflected in the February 1 benefit checks. The increase is in addition to the regular 2% increase on UCRS retirement, disability, survivor, and survivor continuance benefits that is paid each July 1.

UC employees who receive benefits from the Public Employees' Retirement System (PERS) will also receive a special increase in January, the amount depending on the year in which benefits started.

A reimbursement ceiling rate of 21 cents for use of privately-owned vehicles on University business has been approved, effective November 1, 1979. After that date, reimbursement rates in excess of 17 cents and up to 21 cents per mile may be claimed by travelers who incur such expenses, but only in accordance with University-wide regulations which can be found in the Policy and Procedure Manual. The 21 cent rate is available only if actual cost of operating the auto exceeds 17 cents per mile and can be so justified.

The latest and best methods of primary health care will be presented to doctors, nurse practitioners, and nurses at the symposium, "Primary Care: Current Management of Common Office Problems," at the Golden Gateway Holiday Inn, Wednesday, January 30 through Saturday, February 2.

Sponsored by Extended Programs in Medical Education, the symposium features David Gullion, assistant clinical professor of Medicine and assistant director of Extended Programs. For further information call x2894.

The John Muir Medical Film Festival is now accepting 16mm medical film entries for their 1980 medical and health film competition. The entry deadline is January 31. For further information contact Mike Maurer, coordinator, John Muir Medical Film Festival, 1601 Ygnacio Valley Road, Walnut Creek, CA 94598, (415) 939-3000, x20384.

The S.F. Purchasing Office has moved from 101 LS to 1467-4th Avenue. Telephone ext. 2576 remains the same. The move affects the following staff only: Jane Williams, principal buyer; Paul Anderson, buyer; Mary Thomas, assistant buyer; and Cathe Tucker, purchasing assistant. The main Purchasing Office and all other Purchasing staff remain in Richmond.

The 1979-80 Campus Directory is now available and can be picked up between 9 a.m.-noon, and 1-4 p.m. from the Telecommunications Office, "G" Level, Millberry Union. One book will be provided, without charge, for each telephone instrument in your department. Additional directories may be purchased at $1 each. Department account numbers must be given when claiming the directories.

Research Career Development Awards from the National Institutes of Health have been awarded to Thomas James and Norman Oppenheimer, both assistant professors of Pharmaceutical Chemistry, School of Pharmacy.

James was awarded the grant to carry out his studies on the interaction of small molecules by means of NMR spectroscopy. Oppenheimer will devote his research efforts to bio-organic chemistry as applied to drug design.

In addition to the career development awards, the School of Pharmacy received two grants from NIH's National Institute of General Medical Science Shared Instrumentation Program — for C. Anthony Hunt, assistant professor of Pharmacy and Pharmaceutical Chemistry, who will be the project leader for the program that will involve the acquisition of a laser-light scattering photometer. James also has received the NIH Shared Instrumentation grant and will be the principal investigator for a project to expand the nuclear magnetic resonance facility at UCSF to include a wide bore super-conducting magnet.

Funds are now available for faculty from all UC campuses to sponsor conferences and seminars on current topics in cancer research, as announced by UC's Cancer Research Coordinating Committee.

Faculty are encouraged to submit applications for either campus-centered or University-wide conferences or seminars.

The aim of the program is to encourage the exchange of ideas among cancer research investigators and to increase faculty and student awareness of important cancer research developments.

For further information and application forms contact the Secretariat of the Cancer Research Coordinating Committee, c/o Department of Microbiology and Immunology, 3573 Life Sciences Building, UC-Berkeley, 94720, or call 8-582-2923, between 8-11 a.m.

Women 40 years of age or older who are responsible for the care of an ill parent or parent-in-law are being asked to participate in a study conducted by Pat Archbold, a doctoral student in the School of Nursing. For further information call x1504.
